

PipeSak®

STRUCTURED PIPELINE PILLOW

PipePillo®

STRONG - VERSATILE - EASY TO INSTALL

SPP8 PipePillo® is a high-performance structured pipeline pillow (SPP) designed to permanently support and protect fully loaded steel and HDPE pipelines, from a rocky terrain in or out of the trench. PipePillo® supports are the only engineered supports that work with trace wire systems, replacing the need for non-engineered solutions.

THE SMART CHOICE

SPP8 PipePillo® supports are manufactured from high-strength, UV resistant polypropylene resins, ensuring they are lightweight, durable, and environmentally inert. Plus, PipePillo® structured pipeline supports offer 90 degrees of support to eliminate ovality while the unique cross-lay design supports 4”-8” OD pipe.

- ✓ PERMANENT SUPPORT
- ✓ LIGHTWEIGHT & EASY TO INSTALL
- ✓ LOW INSTALLATION COSTS
- ✓ 5 X SAFETY FACTOR
- ✓ OUT-OF-TRENCH SUPPORT
- ✓ FITS SMALL TRENCHES
- ✓ CROSS LAY DESIGN FOR 4”-8” OD PIPE
- ✓ RESISTS FLOTATION
- ✓ MADE IN NORTH AMERICA

STRONG

- The design incorporates a patented dual frustoconical shape which is able to transfer extreme loads.
- PipePillo® supports are light to be manually handled, yet dense enough to resist flotation.
- Made of UV resistant polypropylene resins, ensuring they are lightweight and tough.
- 5X Safety Factor.
- SPP8 PipePillo® supports provide 90 degrees of support to limit ovality

SMART CHOICE

- The PipePillo® patented design is engineered to transfer extreme loads through to the consolidated or virgin soil below.
- The stackable design allows for reduced transportation and shipping costs compared to other pipeline supports.
- Custom notch made to support trace wire systems.

ECO-FRIENDLY

- PipePillos are manufactured from high strength polypropylene resins which are environmentally inert yet softer than pipeline coatings.
- SPP8 PipePillo® will permanently support pipeline above rocky trench bottoms, replacing sandbags, foam or pad dirt.
